3. Product description

Product name: Polyester strap (PET strapping)

Material: polyester strap / PET strapping

Intended use: strapping, securing and stabilising goods on pallets during transport, storage and handling

4. Compliance with the applicable requirements of Regulation (EU) 2025/40 (PPWR)

Article 5 – Requirements for substances in packaging:

Packaging complies with the applicable legal requirements concerning the content of substances. It does not contain prohibited or restricted substances. The total concentration of heavy metals: lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr(VI)) is below the limit value of 100 mg/kg. Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are not used during the production of packaging. Furthermore, the packaging is not intended to come into contact with food.

Article 6 – Recyclable packaging

Packaging has been designed in such a way as to meet the requirements concerning recycling. The materials used can be processed in existing collection, sorting and recycling processes without adversely affecting the quality of the resulting recycled materials or the course of the recycling process.

Article 7 – Minimum recycled content in plastic packaging

The recycled content used has been correctly determined and documented.

Article 8 – Bio-based feedstock in plastic packaging

Packaging is not made from bio-based feedstock; therefore, the relevant requirements do not apply.

Article 9 – Compostable packaging

Packaging is not designed or labelled as compostable. Therefore, the requirements applicable to such packaging are not relevant.

Article 10 – Packaging minimisation

Packaging has been designed in such a way that its weight and volume have been reduced to the technically necessary minimum, while maintaining the required functionality, safety and performance parameters.

Article 11 – Reusable packaging

Not applicable. The packaging is intended for single use to secure the load and has not been designed as reusable packaging within the meaning of Art. 11 PPWR. After use, it may be transferred to the appropriate collection and material recycling system.

5. Responsibility

We declare the conformity of the packaging component indicated above **on the basis of technical data provided by the manufacturer** and assume responsibility for the formal preparation of this declaration.
